<p>1) Software</p> <p>Teamcenter Author - A Teamcenter Author license provides full functionality on a named user basis. Capabilities offered: Access to full core/foundation functionality on a full time named-user basis. The user license provides data creation and modification for product and process information. Users with a primary role that require daily access to Teamcenter with any data authoring should be provided with an Author seat. Each named user license requires an appropriate database license for Oracle or Microsoft SQL Server. These licenses may be obtained from Siemens or from a third party.</p> <p>Teamcenter Consumer - A consumer user's primary interaction with Teamcenter is to search the environment to locate product data that has been authored and published by other users. Consumer users typically require permission to review, approve and recommend changes to information contained in the environment. These users traditionally don't require a full understanding of the environment's functionality. Instead, they use a subset of the environment's capabilities to perform tasks assigned to them. Each named user license requires an appropriate database license for Oracle or Microsoft SQL Server. These licenses may be obtained from Siemens or from a third party.</p> <p>Teamcenter Consumer - A consumer user's primary interaction with Teamcenter is to search the environment to locate product data that has been authored and published by other users.
