Teamcenter Consumer - A consumer user's primary interaction with Teamcenter is to search the environment to locate product data that has been authored and published by other users. Consumer users typically require permission to review, approve and recommend changes to information contained in the environment. These users traditionally don't require a full understanding of the environment's functionality. Instead, they use a subset of the environment's capabilities to perform tasks assigned to them. Each named user license requires an appropriate database license for Oracle or Microsoft SQL Server. These licenses may be obtained from Siemens or from a third party.		per user	2.00		
TC Integration for Creo - The Teamcenter Integration for Creo provides an integration between Creo Parametric and Teamcenter. The integration provides Creo Parametric users access to Teamcenter capabilities, including Part, Assembly and Family Table management, Check- In, Check-Out, Searching and enhanced data security. It also includes translation capabilities to generate lightweight vizualization files. The number of Integration for Creo licenses purchased should be equal to the number of Creo Parametric licenses. NOTE: "Software and services to support data migration from Pro/ Intralink, Windchill or Pro/PDM are available from our development partner. Contact Siemens product management (Paul Angier) for more details. Software and licensing for the DirectModel translator		per user	5.00
